PACKAGING PROCEDURES
FOR MEDICAL WASTE DISPOSAL • Reusable Containers® and Corrugated Boxes

GENERAL
• Generators are responsible for packaging their wastes.
• Each bag must be hand tied by gathering and twisting the neck of the bag and using a tie or hand knot to secure the bag, and each container must be securely closed.
• Closed bags must not be visible once secondary container is closed.
• Improperly packaged containers or damaged containers will be denied pick-up or returned to the generator.
• Only Regulated Medical Waste can be placed in Stericycle containers.

SHARPS
• Sharp materials ("sharps") must be placed in a puncture-resistant container designed for "sharps" waste. "Sharps" include needles, syringes, broken glass, scalpels, culture slides, culture dishes, broken capillary tubes, broken rigid plastic and exposed ends of dental wires.
• All sharps containers should be properly closed before being placed into secondary containers.
• No loose sharps are permitted outside of sharps containers.

PACKAGING PROCEDURES
FOR MEDICAL WASTE DISPOSAL

STEP 1
LINE CONTAINER OR BOX WITH RED BAG**

STEP 2
TIE BAG WHEN BOX OR CONTAINER IS FULL

STEP 3
CORRUGATED BOXES:
