Bloodborne Pathogens Training Outline
Hosted by Sandra Fryhofer, MD, MACP

This 80-minute Online Training Session Covers:

Module I: Exposure Control Plan – Accessibility to Employees
   A. Overview – Methods for Recognizing Tasks and Activities with Exposure
   B. Methods of Compliance – Hierarchy of Safety Controls
      a. Engineering Controls
         i. Warning Signs, Labels and Color Coding
         ii. Safer Medical Devices
      b. Work Practice Controls
         i. Universal Precautions
         ii. Standard Precautions
         iii. Hand Hygiene
         iv. Regulated Medical Waste
         v. Housekeeping
      c. Personal Protective Equipment
         i. Uses and Limitations
         ii. Basis for Selection

Module II: Workplace Bloodborne Pathogens and the OSHA Standard
   A. OSHA
   B. Bloodborne Pathogens Standard – Accessibility to Employees
   C. General Explanation of Epidemiology and Symptoms of Bloodborne Pathogens
      a. HBV
      b. HCV
      c. HIV
   D. General Explanation of Modes of Transmission of Bloodborne Pathogens
   E. The Body’s Defense System

Module III: Hepatitis B Vaccine and Post-Exposure Controls
   A. Exposure Incident Emergencies, Reporting, Post-Exposure Prophylaxis
   B. Specific Workplace Requirements

Note: The Bloodborne Pathogens Standard (1910.1030) requires that annual training include an interactive question and answer session. Your location’s OSHA Compliance Administrator needs to ensure that this topic is covered in order to fulfill the training requirement.

Please be sure to have all participants sign the attendance sheet located in your Admin Panel.
